

DON'T WAIT!

Get your program in place before OSHA rules take effect.

Ensure a healthy workplace for new and returning employees.

Employers need a way to ensure a safe and healthy work environment. It's hard to keep up with rapidly evolving vaccine guidelines and requirements, and the burden, cost and risk associated with managing employee compliance is daunting.

Whether your organization is subject to state or federal mandates or you've implemented your own workplace testing/vaccination requirements, **TASC Vaccination Verification** relieves the stress of managing compliance and medical records for your workforce.

You'll have **one easy-to-use system** for managing employees, contractors and volunteers at your worksite. They'll get an intuitive user experience that makes program compliance easy. And with **multifactor authentication and data encryption**, you know it's safe.

If you need to supply evidence of your practices or verify an individual's historical submissions for purposes of an audit, we'll ensure you are able to respond to any such requests promptly and avoid non-compliance fines that could cost you thousands. Plus, you're covered by our exclusive **Hold Harmless** agreement.

Enforcement of vaccination and testing mandates may be tied up in the courts. We know from our years of experience in employee benefits and compliance that you need to have a program in place so you're prepared to readily respond to the rules when a decision is made. **Don't wait and take on the work or the risk yourself – act now.**

Here's how it works.

- **An Onboarding Specialist** walks you through setting up your program and the tools available to you online.
- We provide ready-to-use and customizable policy templates to meet the compliance and business needs of your program.
- Using your census file, we create records for impacted individuals and send them instructions on how to get started.
- **In the TASC Mobile App**, an individual snaps a pic of their vaccination record card or test result, enters some basic information and securely submits it to us.
- We verify their submission and provide you with a current status report.

WORKS WITH

Vaccination Reward Account: Customize and fund a benefit account that offers incentives or rewards to individuals for complying with COVID-19 requirements.

FSA, HRA & HSA: Personal Protective Equipment (PPE) is an eligible expense!
